TAWG 2: SESSION 2 TASK 5

During the second session, the panel will be determining the course topics which must be mastered to accomplish the learning objectives of the information security fundamentals course. By identifying common objectives, the panel members will determine the relatedness of course topics. The associated ratings will be used to construct a concept map for the course. The map will identify threshold concepts that are central to understanding information security fundamentals.

TAWG 2 - TASK 5

Map Cybersecurity Job Responsibility Areas to TAWG Domains

To access the panel activities, please type in the email address you used to register for the panel. If you have questions regarding which email address was used or need technical assistance, please send a request to: dhtobey@vivoworks.com.

ACTIVITY INSTRUCTIONS

1. A single Responsibility Area will be displayed on the index card on the left side of the screen. Select one or more NIST Framework domains listed on the right side of the screen which you believe would relate to this responsibility area.

2. After you have reviewed your selection(s) and are satisfied that it represents an accurate mapping, please click submit. A new responsibility area will display on the index card on the left side of the screen.

Repeat steps 1 and 2 until all 14 responsibility areas have been selected and submitted.
